

CLAIMS

What is claimed to be new and desired to be protected by Letters Patent is set forth in the appended claims.

I claim:

1. An apparatus for cleaning the underside of a lawnmower, the lawnmower having a downwardly extending rotating drive shaft upon which the blade is attached, comprising:
 - a. means for spraying water disposed on the shaft of the lawnmower whereby the underside of the lawnmower receives spray; and,
 - b. means for attaching a water supply to said means for spraying water whereby a source of water can be connected thereto.
2. The apparatus of Claim 1, wherein said means for spraying water disposed on the shaft of the lawnmower further comprises a disk, said disk having a plurality of outlet apertures therein, said outlet apertures for transmitting water therethrough, further said disk having a central aperture therein.
3. The apparatus of Claim 2, wherein said central aperture of said disk

receives the shaft of the lawnmower, said disk being disposed about the shaft of the lawnmower.

4. The apparatus of Claim 3, wherein the upper surface of said disk has a plurality of outlet apertures disposed therein so that water is emitted therefrom and sprayed onto the underside of the lawnmower.

5. The apparatus of Claim 4, wherein the lower surface of said disk has a plurality of outlet apertures disposed therein so that water is emitted therefrom and sprayed onto the underside of the lawnmower.

6. The apparatus of Claim 4, wherein the edge of said disk has a plurality of outlet apertures disposed therein so that water is emitted therefrom and sprayed onto the underside of the lawnmower.

7. The apparatus of Claim 6, wherein said means for attaching a water supply further comprises a connector for attaching a water hose thereto.

8. The apparatus of Claim 7, wherein said connector is disposed on the lower side of said disk.

9. The apparatus of Claim 8, further comprising a cap disposed on said connector for preventing the intrusion of dirt.

10. The apparatus of Claim 9, further comprising a non-stick coating disposed on the underside of the lawnmower to enhance the washability of the lawnmower.
